

SMART FLOOR

Smart Floor is looking for new interns to further develop its AWS cloud IoT platform monitoring its innovative product called 'Smart Floor'. This platform is responsible to deliver a diverse range of information to sport coaches and healthcare workers; position of the feet, speed, acceleration and other advanced indicators like risk of falling, fall detection,...

Smart Floor is a young company which is active in both health and sport markets. More information can be found on our website: www.smartfloor.com

The student will work on the Front-End and Back-End of different areas depending on his/her interest:

- New use cases: revalidation, indoor sports,...
- New algorithms: positioning, orientation, fall indicators,...
- Optimizations of the current platform: time sync, faster data acquisition,...

The student will work in a multi-disciplinary team using brand new technology: AWS IoT,...

We are looking for a student able to:

- work independently and in a team
- be open for innovation
- be good at what he/she does
- be motivated

We offer:

- Time to learn
- Freedom
- A nice and open work atmosphere
- A good daily lunch

Interested? Send your resume to Peter Meijer: peter@smartfloor.com, or leave your contact details on our website: www.smartfloor.com
